

THE AUTOMATED Field Technician

Optimize Overhead & Manpower with automated pump calibration, rate setting, rate adjusting, and inventory management with transparent, reliable chemical monitoring and remote control.

Reduce burdensome field-time, driving, and hands-on management by revolutionizing your program to a manage-by-exception approach.

FEATURES

EXTREME ACCURACY

- By automatically calibrating pumps every ~ 15 minutes, you know what the systems are doing, exact injection rates, inventory levels, etc.
- Creates a sense of partnership/trust with operators

COMPLETE CONTROL

- Real-time remote control and monitoring
- Automatically set proportional chemical injection to true production rates with improved accuracy
- Full ability to manage data access to suit your business needs

FLEXIBILITY

- Fits 99% of existing tanks/pumps
- Simple to install
- Low maintenance
- User friendly

TOTAL MONITORING AND ANALYTICS

- Custom analytics dashboards
- Optional secure cloud remote analytics
- Enables collaborative analytics that lead to increased efficiency and profitability
- Complete monitoring of pumps
